Learning Outcomes

On successful completion, students will be able to

- develop and implement efficient algorithms,
- estimate the running time and space consumption of algorithms,
- use standard algorithm libraries and adequate data structures to engineer their algorithms,
- work in teams, and
- give a short oral presentation of the main features of their implementation.

Content

Learning Content:

The course

- gives an introduction to the basic techniques of Algorithm Engineering, with a particular focus on NP-hard problems,
- helps to design, analyze, and implement algorithms, and
- provides insight into problem modeling and solution strategies including search tree algorithms, data reduction techniques, preprocessing, approximation, heuristics, and approaches based on linear programming (using established solvers).

Description of Teaching and Learning Methods

Regelmäßiger Wechsel von Wissens- und Methodenvermittlung in der Vorlesung und Projektarbeit in Kleingruppen.

Diese umfasst regelmäßige Projektbesprechung, Präsentation von Milestones und Wettbewerbe um schnellsten Lösungscode.

Regular switch between the lecture and project work in small groups. The students apply the methods and knowledge taught in the lecture in the project work.

This includes project meetings on regular basis, presentation of mile stones, and competitions for the fastest implementation.
